

PrestaShop themes is a full-function e-commerce system designed for web 2.0. Based on the Smarty engine programming, this system adopts modular design and is of high expansibility. It makes multi-lingual and multi- currency browsing possible. In addition, it supports almost all means of payment, including Paypal. With all these features mentioned above, there is no exaggeration to say that it is the best choice to build a website for foreign trade. All PrestaShop themes offered here are works of art of the first-grade designers in the world and they are breathtakingly beautiful.
