

Zen Cart from one server to another server, Zen Cart the easiest way to migrate a site:

- 1) to stop running the old site
- 2) Copy all of the old site zen cart files, folders to a new host
- 3) Export the old site's database
- 4) Create database at new host, then import the old data
- 5) set up database users and permissions
- 6) two files to modify the new site includes configure.php and admin includes configure.php
Mainly the domain name, physical path, database name, database username, database password, etc.
- 7) login admin area at the new site, modify Store settings - logging options - log saved to the path Store Settings-Sessions-Sessions directory path
- 8) refresh, complete
